Consent Form

The [Clark] County Registrar of Voters is conducting research to evaluate the usability of a ballot design for the [November general] election. We will use the results of these sessions to help improve the usability of ballot.

If you agree to participate, you will use the ballot in the presence of an interviewer and share your thoughts as you select candidates for the ballot races [and decide on propositions].

In this short session, you will

• Respond to a brief questionnaire about you and your voting experience
• Vote using the testing ballot
• Be interviewed by the moderator about using the testing ballot
• Complete a brief questionnaire and interview about your overall experience.

Your participation will take approximately 15 minutes. There is no risk to you if you participate in this study. We will use the information that you provide, along with information from other people, to improve the design of the actual ballot for the [November general] election.

Any information you share will be kept strictly confidential; your name will not be associated with the data we collect from your session. Your privacy will be protected to the maximum extent allowable by law.

Your participation is completely voluntary. You may choose not to participate at all, may refuse to participate in certain procedures or answer certain questions, or may discontinue your participation at any time without penalty. Your decision to participate will not affect your relationship with any local, state, or Federal organizations, or the person who identified you as a potential participant. Agreeing to participate and signing this form does not waive any of your legal rights.

About this usability test

Information about the Study

The purpose of this evaluation was to get your feedback on the effectiveness and usability of the [November general] election ballot. You were asked to vote on the preliminary version of the ballot. You were then asked questions about the usefulness and usability of the ballot in a satisfaction questionnaire.

Usability specialists collect this kind of feedback from representative users in real-world environments to help ensure that the final product will be effective and usable for the intended users. Including user experience testing of ballots and voting systems significantly improves the quality of the products. If you have further questions, please contact the evaluator identified below. For further information about usability testing, you may read the references cited below.
